

THE 'PREZ' HAS A NEW RIDE!

(and it ain't pink!)

Chesapeake Region President
Paula Lynn Ruby
April 2017

Madam President Paula tries out her rare, limited production 2006 Cadillac XLR two-place hardtop convertible. The XLR is on the Corvette platform and has an all Fiberglass body. Fewer than 2500 XLR's were produced. Paula's has under 24,000 miles! (Photos by Gary)

The powerplant is a re-designed 4.6 Northstar V8 that produces 320 horsepower. The XLR hardtop convertible is rear wheel drive with all Corvette suspension. It is produced at the Corvette plant in Bowling Green, Kentucky. As you can see in the photo on the left, the roof disappears into the trunk compartment. Raising or lowering the top in thirty seconds is amazing! This two-place XLR is 'a Corvette in a tuxedo.' It has all the performance of a Corvette with an overabundance of style and class. Some of the great features available on the car are: Adaptive Headlights, Adaptive Cruise Control and nine speaker BOSE stereo system with XM/Satellite radio. No, Paula didn't trade in her '37 Packard resto or Corvette!
